Comments

See Table 11 in Guidance for the use of IFRA Standards for details. Table 11 gives the products placed in the 12 IFRA Categories and subcategories with detailed comments for specific product types.

Disclaimer: This Certificate provides restrictions for use of the specified product based only on those materials restricted by IFRA Standards. It does not provide certification of a comprehensive safety assessment of all product constituents.

The table was prepared with the intention to cover the vast majority of the products; however, it may not cover some specific applications. In this case other categories may be attributed based on a specific risk assessment.

***Hair perfume has been placed in Category 7 as a general entry. Please take note that this applies if the product is marketed specifically for hair. If it is a product that can be sprayed on hair as well as other parts of the body or if the marketing/label is not explicit, then some consumers might spray the product directly onto the skin, and therefore the application would be similar to a fine fragrance and the product should be treated as a product in Category 4.**

We draw your attention on the fact that this certificate is a standard template of information exchange between supplier and customer. It concerns the compliance to IFRA standards at the latest amendment of the fragrance/flavour concentrate only and not the safety assessment of the finished product.

In no case this document can be seen as a replacement of your obligations and responsibilities as the party manufacturing, launching or distributing the product for sale in the market.

We disclaim all responsibility in case of possible interactions between the fragrance/flavour concentrate and the other ingredients used in the finished product, which cannot be taken into account by this evaluation. The information contained herein is, to the best of our knowledge, true and accurate at the time it is given.

CERTIFICATE OF CONFORMITY OF FRAGRANCE MIXTURES WITH IFRA STANDARDS

This Certificate assesses the conformity of a fragrance mixture with IFRA Standards and provides restrictions for use as necessary. It is based only on those materials subject to IFRA Standards for the toxicity endpoint(s) described in each Standard.

Comments

See Table 11 in Guidance for the use of IFRA Standards for details. Table 11 gives the products placed in the 12 IFRA Categories and subcategories with detailed comments for specific product types.

Disclaimer: This Certificate provides restrictions for use of the specified product based only on those materials restricted by IFRA Standards. It does not provide certification of a comprehensive safety assessment of all product constituents.

The table was prepared with the intention to cover the vast majority of the products; however, it may not cover some specific applications. In this case other categories may be attributed based on a specific risk assessment.

***Hair perfume has been placed in Category 7 as a general entry. Please take note that this applies if the product is marketed specifically for hair. If it is a product that can be sprayed on hair as well as other parts of the body or if the marketing/label is not explicit, then some consumers might spray the product directly onto the skin, and therefore the application would be similar to a fine fragrance and the product should be treated as a product in Category 4.**
